OTGONBAATAR AMARBOLD

Electronic Engineering

PROFILE

I graduated from the Department of Electrical Engineering at Gunma University in March 2023. During my time at university, I had the opportunity to learn both hardware and software, but I realized that my interests and abilities were more suited to the software field. In order to pursue my studies and work in the software field, I came to Mongolia. I have a strong interest in constantly learning new things and I enjoy taking on challenges, which is why I believe a career in IT engineering and programming is a good fit for me.

EDUCATION

GUNMA UNIVERSITY/2021-2023/
The Department of Electronic and Electrical Engineering
